

1. We need the CCAA/CCA drafts to publish before the end of June to allow for enrollment prior to a possible listing effective date
2. Due to the limited range of the CCA/CCAA (Black and Delaware Rivers), there is no expectation that these agreements would preclude the need to list the species, if listing is warranted.
3. The August deadline for a listing determination is court ordered and part of the MDL settlement.
4. The listing would be effective 30 days from a final FR publication.
5. We will be using the memo from the LPC range-wide plan that allows for us to complete individual Certificates of Inclusion/Participation, as long as participants have submitted applications prior to a listing effective date.
6. We have identified potential participants and have coordinated with the affected landowners and oil and gas companies who may participate in the CCAA. They are positioned to enroll in the allotted time (30 days).
7. We have created a streamlined application process that allows participants to get their foot in the door. As long as an initial application is submitted prior to the effective date of the rule, we can work with participants to finalize their enrollment. At any point after their application is received, participants can choose to decline enrollment.
